

Paintless Dent Removal Tool

INDUCTOR® U-111 PDR BATON ATTACHMENT

Unlike traditional PDR or Paintless Dent Removal, the Invisible Heat method is the cleanest and fastest way for fixing hail dents, door dings and other minor soft dents. There is no need to meticulously massage out from the backside of vehicle panels, especially in hard-to-reach areas, or areas difficult to get behind. Induction heating is the highest tech method for removing soft dents; the result is a clean dent repair in a fraction of the time compared to a conventional PDR tool.

The NEW U-111 PDR Baton is ergonomically designed and moulded in high temp / impact resistant epoxy polymers for additional durability and versatility longevity. Tapered body and bevelled edges on this attachment allows for balanced grip. Works in conjunction with either the PRO-MAX or the MAX power supplies

- 1 Year Warranty
- Tapered body with balanced design for tight areas
- Remove Hail and Soft Dents
- HF cable to inverter 9 feet
