

Mini-Ductor® 110V CE [Model MD-700CE]

The NEW Mini-Ductor® 110V CE

A 'must have' for professional commercial mechanics, the new 110V Mini-Ductor® tool uses flameless heat to heat metal parts in seconds. Its use allows all types of adhesives bonded to metal, bonded with thread lock compound and seized hardware to be removed and released more quickly and safely than by traditional naked flame heating.

With an integrated CE filter, the Mini-Ductor® 110V CE is easy to manage, energy efficient and ergonomically balanced to reduce user fatigue.

It's the perfect tool to use instead of an oxy-acetylene powered open flame and can be used wherever 110V power supply is available.

- Provides quick heat – an almost instant result
- Reduces need for tricky risk assessments
- Carry case; with storage for all attachments, fits in tool chests for security.

Find out more by calling +44 (0)1953 859138 or visit www.inductivelogic.co.uk/flameless-heating-products.html

Produced by the world's leading manufacturer of automotive handheld induction heating products.

Specifically designed for the UK/EU: 110v/9.09 amp/1000 watt – with full CE certification.

Technical Specification

CE marked & RoHS compliant	
Length	15"
Depth	2.5"
Weight (including case)	3kg
Case material	Military grade virgin plastic, not recycled, for best durability
Power supply	110v/ 9.09 amp/1000 watt
Power output	1000 watt [max]
Warranty	1 year [limited]
Accessories [included in box]	Pre-formed coil MD99-601, U-form coil MD99-602 & Bearing buddy MD99-603
