INVISIBLE HEAT®

Using high frequency magnetic fields (induction heat), Pro-Max generates Invisible Heat® to remove all types of adhesives bonded to metal, release seized hardware from corrosion or thread lock compounds, all without the collateral damage normally associated with conventional methods such as torches.

The Pro-Max is only available through authorized warehouses, jobbers and online resellers.

INDUCTION INNOVATIONS

Inductor® Pro-Max

High Performance Induction Heating Tool

Using high frequency magnetic fields, heat ferrous metals without collateral damage to nearby plastic parts. Remove ALL types of adhesives bonded to metal, release seized hardware from corrosion or thread lock compounds.

Inductor® Pro-Max

Uses: Automotive, Construction, Farm Implements, Industrial, Marine

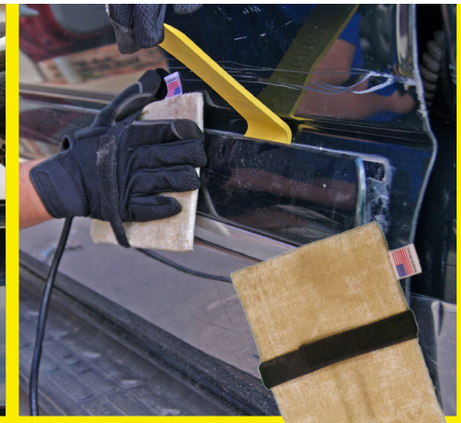
Reduce labor by 75%
Re-use parts normally discarded
Save on consumables
Reduce the need for toxic solvents
Flameless: safer than a torch

Pro-Max Features

High performance/energy efficient induction heat inverter that maximizes use of a 120V/20A circuit.
Rated: input 2,200W, max output 2,000W
Audible and visual power indicators
Fine tuning linear power control
Pneumatic foot switch (Resilient to dirt and water)

- Inductor® attachments quickly heat ferrous workloads without the risk of damaging nearby plastics or rubber
- 2200W peak output inverter maximizes use of 120v/20A circuit
- UL/CSA listed GFCI for user safety
- Audible and visual power indicator
- Pneumatic foot control (resilient to dirt and water damage)
- Warranty: power inverter 2 yrs / attachments 1 yr

Inductor® Pro-Max® Includes:
Pro-Max inverter, U-211 Fast-Off ® Pad, U-311 Glass Blaster®, U-411 Concentrator® . Accessories: (1) set L-wedges, Manual and Tutorial DVD.



Concentrator® (U-411)

The Concentrator® Attachment instantly heats nuts, bolts and all types of hardware red-hot in seconds. Allows the user to remove body caulking in minutes leaving a clean surface and spot welds intact.

- Used to remove: corroded hardware, thread Lock compounds, seam sealers, soft dents, metal shrinking and fabrication.
- Tapered body, beveled edges and compact design for tight areas.
- Turns a 3/4" steel fastener Red Hot in seconds if desired.
- Encapsulated in a a high-temp, impact resistant polymer resin.
- No collateral damage of an open flame.

Fast-Off® Pad (U-211)

The Fast-Off® attachment removes stripes, vinyl graphics, body side moldings, sound pads, vapor barriers, stress relieving sheet metal repairs and more. Literally saves hours on labor plus the added bonus on solvent-free removal as adhesive remains on graphic!

- Reduces labor or cleanup time by as much as 80%. Little need for toxic solvents or expensive consumables. Adhesive typically stays with the part and salvages parts in most cases.
- Uses include: moldings, vinyl graphics, vapor barriers, sound pads, nameplates or emblems, undercoatings, stress relieving sheet metal, pre-heat cold panels for the application of adhesive components or coatings and more.

Glass Blaster® (U-311)

The U-Series Glass Blaster® Attachment removes bonded glass, SMC panels, metal bond adhesives and spray-on bedliners. Windshields can be removed in less than 15 minutes, while spray-on bedliners in as little as ½ day.

- Operates from the outside of vehicle with no damage to the encapsulation or glass.
- Uses include the removal of: glass, appliques, bonded SMC panels, metal bond adhesives and spray-on bed liners.
- Contoured beveled edges places magnetic field closer to the work load for the removal of Glass, Spray-on Bed liners and for accessing tighter corners.

Additional Attachments

U-555 Attachment

- Heat releases seized hardware
- Operates with Inductor Pro-Max and Max Inverters
- Minimum 40% (load dependent) more power and operates faster than Mini-Ductor II
- Works with all Mini-Ductor attachments
- Includes 3 basic work coils, carry case and manual

Rosebud® (U-511)

(Aluminum/Frame Heater)

- Heat 1/4" steel red hot in less than 60 sec. - air-cooled for long-term use
- Operates with Inductor Pro-Max and Max Inverters
- Uses: aluminum, vinyl graphics, adhesives, frame repair, stress relieving, metal bond adhesives and fabricating

PDR Baton (U-111)

- Remove soft dents by heating the panel and relieving the stress holding the dent
- Operates with Inductor Pro-Max and Max Inverters
- Ergonomically designed and molded for durability and longevity
- Tapered body and beveled edges allows for a balanced grip
